Art Unit: 1712

Applicant is advised that should claim 8 be found allowable, claim 13 will be objected to under 37 CFR 1.75 as being a substantial duplicate thereof. When two claims in an application are duplicates or else are so close in content that they both cover the same thing, despite a slight difference in wording, it is proper after allowing one claim to object to the other as being a substantial duplicate of the allowed claim. See MPEP § 706.03(k). Claim 8's "no more than 10%" covers precisely the same range as claim 13's "more than 0%-10%". Claims 14 and 15 are also duplicates of one another.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 2-5, 8-11 and 13-15 rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims call for triblock polymers, yet the branching agent presumably is tetrafunctional. At a minimum, four blocks would be present. The sequential polymerizations that include tetrafunctional branching agents (eg # 4) would have more than one block in each branch. This would be at least eight blocks in the overall polymer.

The teraacetate branching agent (CAS registry number 59602-16-3) now limited to cannot be found as branching agent for polyamides or polyesters in the prior art.
